## DC-DC Battery Charger

12V | 20A/40A

RBC20D1U-G1/RBC40D1U-G2

VERSION A4  
April 15, 2025

### QUICK GUIDE

## Before Getting Started

The quick guide provides important operation and maintenance instructions for Renogy 12V 20A/40A DC-DC Battery Charger (hereinafter referred to as battery charger).

Read the quick guide carefully before operation and save it for future reference. Failure to observe the instructions or precautions in the quick guide can result in electrical shock, serious injury, or death, or can damage the battery charger, potentially rendering it inoperable.

## What's In the Box?

Renogy 12V 20A/40A  
DC-DC Battery Charger x 1

Quick Guide x 1

ST4\*16 mm

Mounting Screws x 4

Battery Temperature  
Sensor (2 m) x 1

IGN Signal Wire  
(3 m) x 1

Make sure that all accessories are complete and free of any signs of damage.

The accessories and product manual listed are crucial for the installation, excluding warranty information and any additional items. Please note that the package contents may vary depending on the specific product model.

## Dimensions

### 20A DC-DC Battery Charger (RBC20D1U)

### 40A DC-DC Battery Charger (RBC40D1U)

Dimension tolerance:  $\pm 0.2$  in (0.5 mm)

## Get to Know Renogy Battery Charger

The Battery Temperature Sensor (BTS) port can only be used with lead-acid batteries.

# System Setup

— Positive — Negative — Temperature — Communication — IGN Signal

## Required Tools

Phillips  
Screwdriver (#1)

Insulating Gloves

Measuring Tape

Insulation Tape

Prior to installing and configuring the battery charger, prepare the recommended tools, components, and accessories.

## Step 1. Wear Insulating Gloves

Insulating Gloves

## Step 2. Plan a Mounting Site

The battery charger requires adequate clearance for installation, wiring, and ventilation. The minimum clearance is provided below.

-40°F to 185°F  
-40°C to 85°C

% 0% to 95%

KEEP DRY

FRAGILE

VENTILATION

INDOOR

The battery charger should be installed on a flat surface protected from direct sunlight.

### Step 3. Connect the Battery Charger to an Auxiliary Battery

The battery charger can only be connected to deep-cycle gel-sealed lead-acid batteries (GEL), flooded lead-acid batteries (FLD), sealed lead-acid batteries (SLD/AGM), or lithium iron phosphate batteries (LI).

#### Recommended Components & Accessories

\*12V Battery

RBC20D1U: 30A  
RBC40D1U: 40A

\*ANL Fuse x 1

RBC20D1U: 10 AWG  
RBC40D1U: 8 AWG

Battery Adapter Cables x 2

RBC20D1U: 10 AWG  
RBC40D1U: 8 AWG

Fuse Cable x 1

Accessories marked with "\*" are available on [renogy.com](https://www.renogy.com).

For installation details, see the user manual of the battery in use.

To ensure optimal system performance, a 10 AWG/8 AWG cable should be no longer than 3 meters. Choose higher gauge cables for longer distances. For details, see the user manual of the battery charger at [www.renogy.com/support/downloads](https://www.renogy.com/support/downloads).

### STEP-1 Install cables on the battery charger

### STEP-2 Install an ANL fuse

### STEP-3 Install the cables on the battery

## Step 4. Connect the Battery Charger to a Starter Battery

Before installing the charger, consult your vehicle's user manual or contact the vehicle manufacturer to ensure that the alternator power does not exceed 720W with the output current within the range of 75A to 100A.

### Recommended Components & Accessories

RBC20D1U: 40A  
RBC40D1U: 80A

\*ANL Fuse x 1

RBC20D1U: 8 AWG  
RBC40D1U: 6 AWG

Battery Adapter Cables x 2

RBC20D1U: 8 AWG  
RBC40D1U: 6 AWG

Fuse Cable x 1

Accessories marked with "\*" are available on [renogy.com](https://www.renogy.com).

**Traditional DC Alternator (IGN connection not required):** The starter battery begins charging the auxiliary battery when its voltage reaches 13.2V & 15s and stops charging when the voltage drops to 12.7V.

**Smart DC Alternator (IGN connection required):** The starter battery begins charging the auxiliary battery when its voltage reaches 12V & 15s and stops charging when the voltage drops to 11.5V.

### STEP-1 Install cables on the battery charger

### STEP-2 Install an ANL fuse

### STEP-3 Install the cables on the RV starter battery

## Step 5. Install a IGN Signal Wire (for Smart DC Alternator)

IGN signal wiring is required for smart alternators only. For how to distinguish a smart alternator from a traditional one, see the user manual of the battery charger. If the DC alternator of the vehicle is a smart alternator, insert the IGN Signal Wire connector into IGN signal wire port, and then connect the other end to the smart alternator's ignition signal port.

Consult the RV supplier for wiring details.

## Step 6. Install a Battery Temperature Sensor

The temperature sensor measures the surrounding temperature of the battery and compensates the floating charge voltage when the battery temperature is low.

Do not use the temperature sensor on a LiFePO4 (LFP) battery which comes with a battery management system (BMS).

Mount the sensor securely  
at a suitable location in  
close proximity to the battery.

## LED Indicators

The battery charger turns on automatically after power on with the LED indicators working in accordance with the relative operating status.

### Battery Status Indicator

**Solid:** The battery charger is in standby mode\*, or the auxiliary battery is fully charged.

**Flash:** Charging the auxiliary battery

Battery

Fault

Type

### Battery Type Indicator

**Solid:** SLD/AGM

**Solid:** GEL

**Solid:** LI (lithium battery activation disabled)

**Solid:** LI (lithium battery activation enabled)

**Solid:** User Mode

**Solid:** FLD

### Fault Status Indicator

**Off:** No fault

**Slow flash:** Reverse contact protection for starter battery

**Solid:** Overtemperature protection for auxiliary battery

**Slow flash:** Overtemperature protection for battery charger

**Fast flash:** Overvoltage protection for auxiliary battery

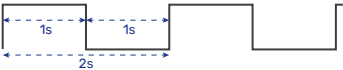

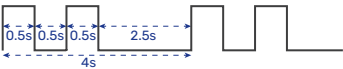

**Jumping flash:** Overdischarge shutdown protection for auxiliary battery

**Standby Mode\*:** The battery charger is only connected to the auxiliary battery, and the auxiliary battery voltage is greater than 12V.

## Graphic indications of ON and OFF

<b>LED ON</b>		<b>LED OFF</b>	
---------------	---	----------------	---

## Graphic expression of Solid, Slow Flash, Fast Flash, and Jumping Flash

LED Pattern	Description	Graphic Expression
Solid	The LED remains continuously illuminated without any variation.	
Slow Flash	In this mode, the LED alternates between being on and off at a relatively slow and regular interval of 1s.	
Fast Flash	In this mode, the LED alternates between being on and off at a relatively fast and regular interval of 0.1s.	
Jumping Flash	In this mode, the LED alternates between brief 0.5s on-off cycles followed by a longer 2.5s off period.	

## Set a Battery Type

Upon installing the battery charger, set a correct battery type by using the Battery Type Setting Button.

It is essential to ensure that the battery type setting is configured correctly to avoid any potential damage to the battery charger because any damage to the battery charger resulting from an incorrect battery type setting voids the warranty.

## USER Mode

Setting the battery type to User Mode allows you to customize your battery parameters. You can modify the parameters in the Renogy app.

When customizing settings, consult the user manual provided by the battery manufacturer. If necessary, contact the manufacturer for further assistance.

For detailed parameter settings, see the user manual of the battery charger at [renogy.com/support/downloads](https://renogy.com/support/downloads).

## Monitor the Battery Charger

### Recommended Components

\*Renogy BT-2 Bluetooth Module

Accessories marked with "\*" are available on [renogy.com](https://www.renogy.com).

Before adding this product to the Renogy app or Renogy ONE, please ensure that both the app version and the firmware version of Renogy ONE have been updated to the latest version.

You can customize the charging current through the Renogy app.

Download the Renogy app. Login to the app with your account.

The version of the Renogy app might have been updated. Illustrations in the user manual are for reference only. Follow the instructions based on the current app version.

To ensure optimal system performance, keep the phone or RENOGY ONE within 10 feet (3 m) of the battery charger.

You can receive fault alarms on Renogy and Renogy ONE when the battery charger is faulty. Please login to the Renogy app or Renogy ONE for troubleshooting details.

## Short-Range Monitoring via Renogy App

Pair the battery charger with the Renogy app. Monitor and modify the parameters of the battery charger via the app.

## Wireless Long-Range Monitoring

### Recommended Components

\*RENogy ONE Core

## Important Safety Instructions

### ■ General

- Wear proper protective equipment and use insulated tools during installation and operation. Do not wear jewelry or other metal objects when working on or around the battery charger.
- Keep the battery charger out of the reach of children.
- Do not dispose of the battery charger as household waste. Comply with local, state, and federal laws and regulations and use recycling channels as required.
- In case of fire, put out the fire with a FM-200 or CO<sub>2</sub> fire extinguisher.
- Installing the battery charger improperly on a boat may cause damage to components of the boat. Have the devices installed by a qualified electrician.
- Do not expose the battery charger to flammable or harsh chemicals or vapors.
- Clean the battery charger regularly.
- Do not puncture, drop, crush, penetrate, shake, strike, or step on the battery charger.
- Do not open, disassemble, repair, tamper with, or modify the battery charger.
- Connect the negative prior to the positive terminal when connecting any device.
- It is recommended that all cables should not exceed 10 meters because excessively long cables result in a voltage drop.
- The cable specifications listed in the quick guide account for critical, less than 3% voltage drop and may not account for all configurations.

## ■ Battery Charger Safety

- Install the battery charger on a vertical surface - protected from direct sunlight, high temperatures, and water. Make sure there is good ventilation.
- Keep the battery charger away from heating equipment.
- Do not insert foreign objects into the battery charger.
- Confirm the polarities of the devices before connection. A reverse polarity contact can result in damage to the battery charger, thus voiding the warranty.
- Do not touch the connector contacts while the battery charger is in operation.
- Disconnect all connectors from the battery charger before maintenance or cleaning.

## ■ Battery Safety

- Do not use batteries if there is any damage.
- Do not touch the exposed electrolyte or powder if the battery is damaged.
- Risk of explosion! Never install the battery charger in a sealed enclosure with flooded batteries! Do not install the battery charger in a confined area where battery gases can accumulate.
- Prior to installing the battery charger, ensure all battery groups are installed properly.

## FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- (1) Reorient or relocate the receiving antenna.
- (2) Increase the separation between the equipment and receiver.
- (3) Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- (4) Consult the dealer or an experienced radio/TV technician for help.

## FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

## Renogy Empowered

Renogy aims to empower people around the world through education and distribution of DIY-friendly renewable energy solutions.

We intend to be a driving force for sustainable living and energy independence.

In support of this effort, our range of solar products makes it possible for you to minimize your carbon footprint by reducing the need for grid power.

## Live Sustainably with Renogy

Did you know? In a given month, a 1 kW solar energy system will...

Save 170 pounds of coal from being burned

Save 300 pounds of CO<sub>2</sub> from being released into the atmosphere

Save 105 gallons of water from being consumed

## Renogy Power PLUS

Renogy Power Plus allows you to stay in the loop with upcoming solar energy innovations, share your experiences with your solar energy journey, and connect with like-minded people who are changing the world in the Renogy Power Plus community.
